timeliz wrote on Thu, 25 April 2019 23:15Gary,

You can take a peek down memory lane at this Hamilton 21 here :

[https:// atgvintagewatches.com/military-watches-forum-nsn-6645-a/7372-incoming-hamilton-model-21-ships-chronometer.html](https://atgvintagewatches.com/military-watches-forum-nsn-6645-a/7372-incoming-hamilton-model-21-ships-chronometer.html)

Darn! Now I want one. :?

Liz that clock is the same one we had on our ship, beautiful! I can still recall the quartermaster setting our Chelsea clocks to the time he obtained from the Hamilton chronometer using his Hamilton deck pocket watch to transfer the correct time to all the clocks throughout the ship.

We have a Navy doctor in our clock organization who served in Korea era that works and collects these Hamilton chronometers. He put one up for auction last year and it went for \$1,000. Now I'm thinking that was a steal. I'm sure he will put another one up for auction this year, I ask him if he intends to.

There is a lot of information on the Waltham that I'm seeing now. These clocks were the first mounted chronometers purchased by the Naval Observatory. These were standard 8 day 7 jewel car clock movements but were made to the observatory's standards like having an upper diamond cap jewel, gold balance, double roller escapement and sapphire roller jewel.

Here another picture of the clock showing it's double box, also a 1917 ad from Life magazine I believe.

## The Waltham Chronometer

### Times the War Ships of Uncle Sam and Britain

Dreadnoughts of war guarding the gateways of nations; destroyers vigilantly roaming the seas in quest of their hidden prey; ocean leviathans that carry their passengers safely from shore to shore when peace reigns — these are guided in their activities by Waltham Chronometers.

No greater faith was ever shown in the precision of a timepiece than when the war governments of the United States, England and Canada placed their orders at Waltham. Faith based on tests which proved the reliability and precision of the Waltham Chronometer.

Waltham, the only watch factory in the world equipped to make Chronometers, is also supplying other timepieces for war work. Deck clocks, comparing watches, airplane clocks, wrist watches, all made at Waltham, are doing their bit in helping the Allies go "over the top" to victory.

Visit the jeweler whose reputation stands highest for quality. Ask him to show you some of the Waltham models—for example, the Riverside. Here is a watch you will be proud to give or to own. Moderate in price, and made in five sizes—three for men and two for women.

The Riverside symbolizes that lofty ideal of fine watchmaking which has led the horological experts of the greatest nations to choose Waltham in preference to any other watch made in America—in preference also to the finest timepieces of Switzerland, England or France.
