Hey fellow Gruen aficionados,

Hope everyone is doing well during these testing times. I recently got my hands on a Gruen Doctor's Watch - 1928-1930 Techni Quadron w/ 877S movement, Yellow Gold. The Techni Quadron series has been the foundation of my passion for vintage watches and in my opinion, the one I purchased is a great example of it (please do let me know your thoughts on it). As you can tell though, the crown and the seconds hands are not original to the watch so I am looking to track down an original Gold crown and Blue seconds hand if possible from one of you if I am lucky.

Please also let me know if you have any of these mentioned parts and/or Gruen Techni Quadrons especially the Alpina Gruen version if you're thinking of letting go. I would love to chat further to add to my collection!

Sincerely,
Sean
