---

Smashed the pivot on the 435 pallet arbor I've been servicing.

Not content to call it a night, I pulled the pallet fork from my donor 335 and smashed its arbor pivot too. :blush:

Almost done with this service. FOUND the last replacement pallet fork in the swamp. Interchange catalog shows this as a caliber 430 part.

Thanks in advance!

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the needs of older people, and the need to ensure that the health care system is able to meet the needs of older people. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to older people and the need to ensure that the health care system is able to meet the needs of older people.

The strategy for older people is based on the following principles:

- Older people should be able to live independently in their own homes for as long as possible.
- Older people should be able to access the health care services that they need.
- Older people should be able to participate in decisions about their care.

The strategy for older people is based on the following principles:
