Jenneke wrote on Mon, 11 July 2022 21:39And the winding stem for FHF 1146 10.5 does fit the cal 885.

I have to correct myself. The watch movement has been in a tray for a year. Tried to assemble it but... I now think it almost fits, but not enough.

When the stem is completely pushed in, the setting lever is not sitting in its notch. But I dont have a stem or movement to compare it with.

So, if someone has good pictures to show me I am right (or stupid: roll:), please share them.
