I've been on the watch for one for a long time but it takes penitence to look at the 6 o'clock position for that sub. Since I've been aware of this model (maybe a couple of years) I've seen quite a few and none of them have had the little submarine at 6:00. I'm starting to wonder if it's just something in the ad illustration that never was actually produced. Of course, I could be wrong. But I've never seen one.
