Well, I will say one thing... the case is the rare aspect.
+100. Guildite/Staybrite/steel may or may not be more desirable than solid gold in the general market, but to me (and I'm sure some others) it's infinitely more interesting and definitely far rarer. I'd trade a solid gold Curvex for a steel one in a heartbeat, no questions, redial or not. Well bought. FWIW, my waffling wasn't over the price. I thought it was a great buy. I was only pondering whether I needed it or not.
