Thanks so much Barney! I found the drawing for the box! Thanks for providing the patent number I was hoping the box was earlier for my Majesty. I guess I need to find the plastic version of this box which I think is correct for my watch. This is still a GREAT piece for my other Curvex's. Thanks again!

Here's the link to the drawing.

Barney Green wrote on Thu, 27 July 2017 10:18 That's a good one to ID, because it is patented. Mr. Eugene Lux from Gruen filed for the patent on April 25, 1936 which was granted as US patent no. 2,157,990 on May 9, 1939. So I think you are lucky and it is from the 30s.

Cool!

Barney
