---

The watch is 18 karat white and yellow gold. I have read somewhere that the crown on these watches were never solid gold. The more I examine the pictures that were sent, the more I may conclude that the center bezel may be 18 karat rose gold.

What style of hands would be appropriate for this model? I should have the watch in about a week, I will take some pictures and seek additional advice.

If the center bezel is 18 karat rose gold , would the dial color option be pink / salmon color, if so, then the hands would be white I speculate.
