I'm probably asking for the impossible, but I will try anyway...

Does anyone have a dial for the Gruen Super G or Airway (same dial without "Super G" print at the 6 position) that she/he is willing to sell?

This is the 1st generation of the model with the 422SS movement fitted.

There were quite a few dial variations made, but this is an example of the Airway with the dial I'm looking for.
