Fine work and descrption. The 52mm similar appearing one I bought as Majesty model has identical appearance and numbers. Same Wadsworth case 330/295 is numbered G0668xx. Same movement. Same dial with big 6 under seconds scale. The outside surface of g.f. case does maybe seem a little thicker indicating a Peer model? If so I like it better than a Majesty.

The cases look very similar, but the Majesty is 2mm longer than the Peer. Also you can tell from the style numbers (Majesty = 292 and Peer = 295) that the bezel and as a result the crystal size is also different.

Cary, what is the 311 referring to in the title? If it is the movement you may want to correct it....

I really appreciate the efforts my confusion about this 52mm, by my measurement, Peer has prompted. I really do not care if a Majesty or Peer. I do not like long cases sized by lug length. For a longest Gruen I have the cheap? 15j flat movement 500 in the 501 long narrow curved case that seems longest I guess because of short lugs and narrow width.

Notice I made spotty dial look better with minor photo adjustments. I will henceforth not waste time here looking for w.w.model names and be satisfied with case numbers like this one 501/296.. Although slightly different cases have same case numbers?

Thanks for that. I was trying to distinguish between the 330 and 370 versions of the Majesty. I've changed the title, but perhaps a mod (Jack?) can change it in the replies.

Thanks again,

Cary

Done. Changed 311 to 330.
