
Subject: Hour hand caliber 675 (solved)

I bought a ladies duo dial, caliber 675 (It says 675 inside case, so assume it is not the 907...) with 7 jewels. It arrived without its hour hand. Seller cant find it :(

I have got another same looking duo dial movement with 15 jewels. Maybe 905? Case also has 675 number...

1939 material catalog:

Cannon pinion...

Does the 15 jewel hand fit on the 7 jewel movement?

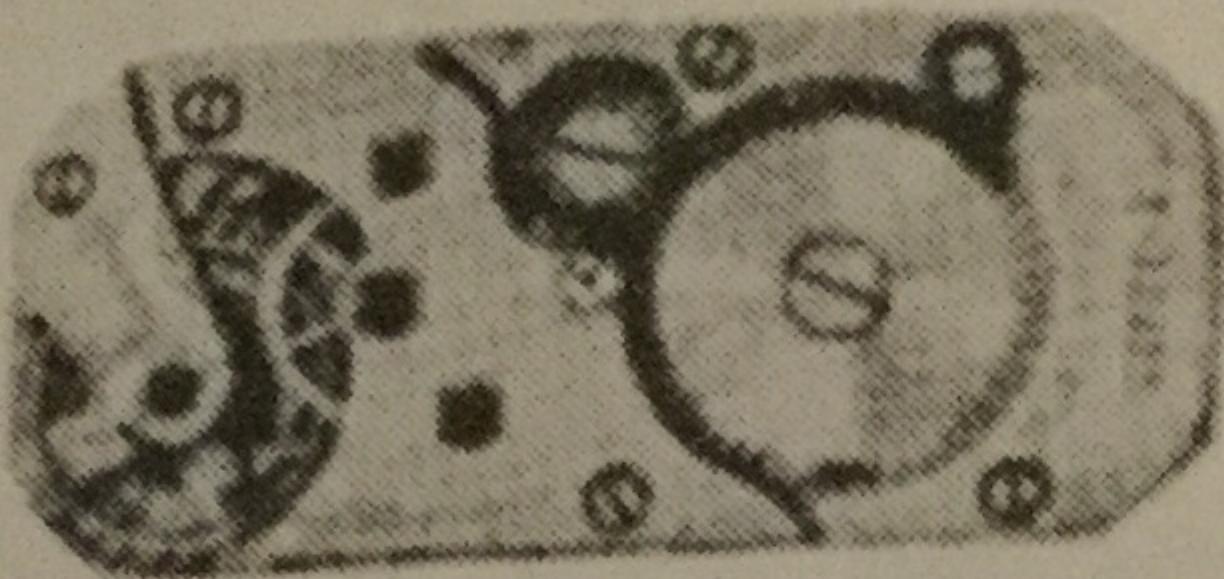

Or does anyone have a fitting matchstick hand?

Can post movement/dial pictures if needed.

$4\frac{3}{4}''$

- No. 675* — 7 jewels
No. 905 — 15 jewels
No. 907† — 7 jewels

These movements
are made of solid
gold and are suitable
for men's watches.

I may have one. A pic and a measure of your minute hand would help. The other may fit, as they're Peseux 10 variants.

You may also have luck searching the 675/905 equivalent Bulova 4AD. There are two models, both 4AD, one the duo dial 7J.

My spare 15 jewels

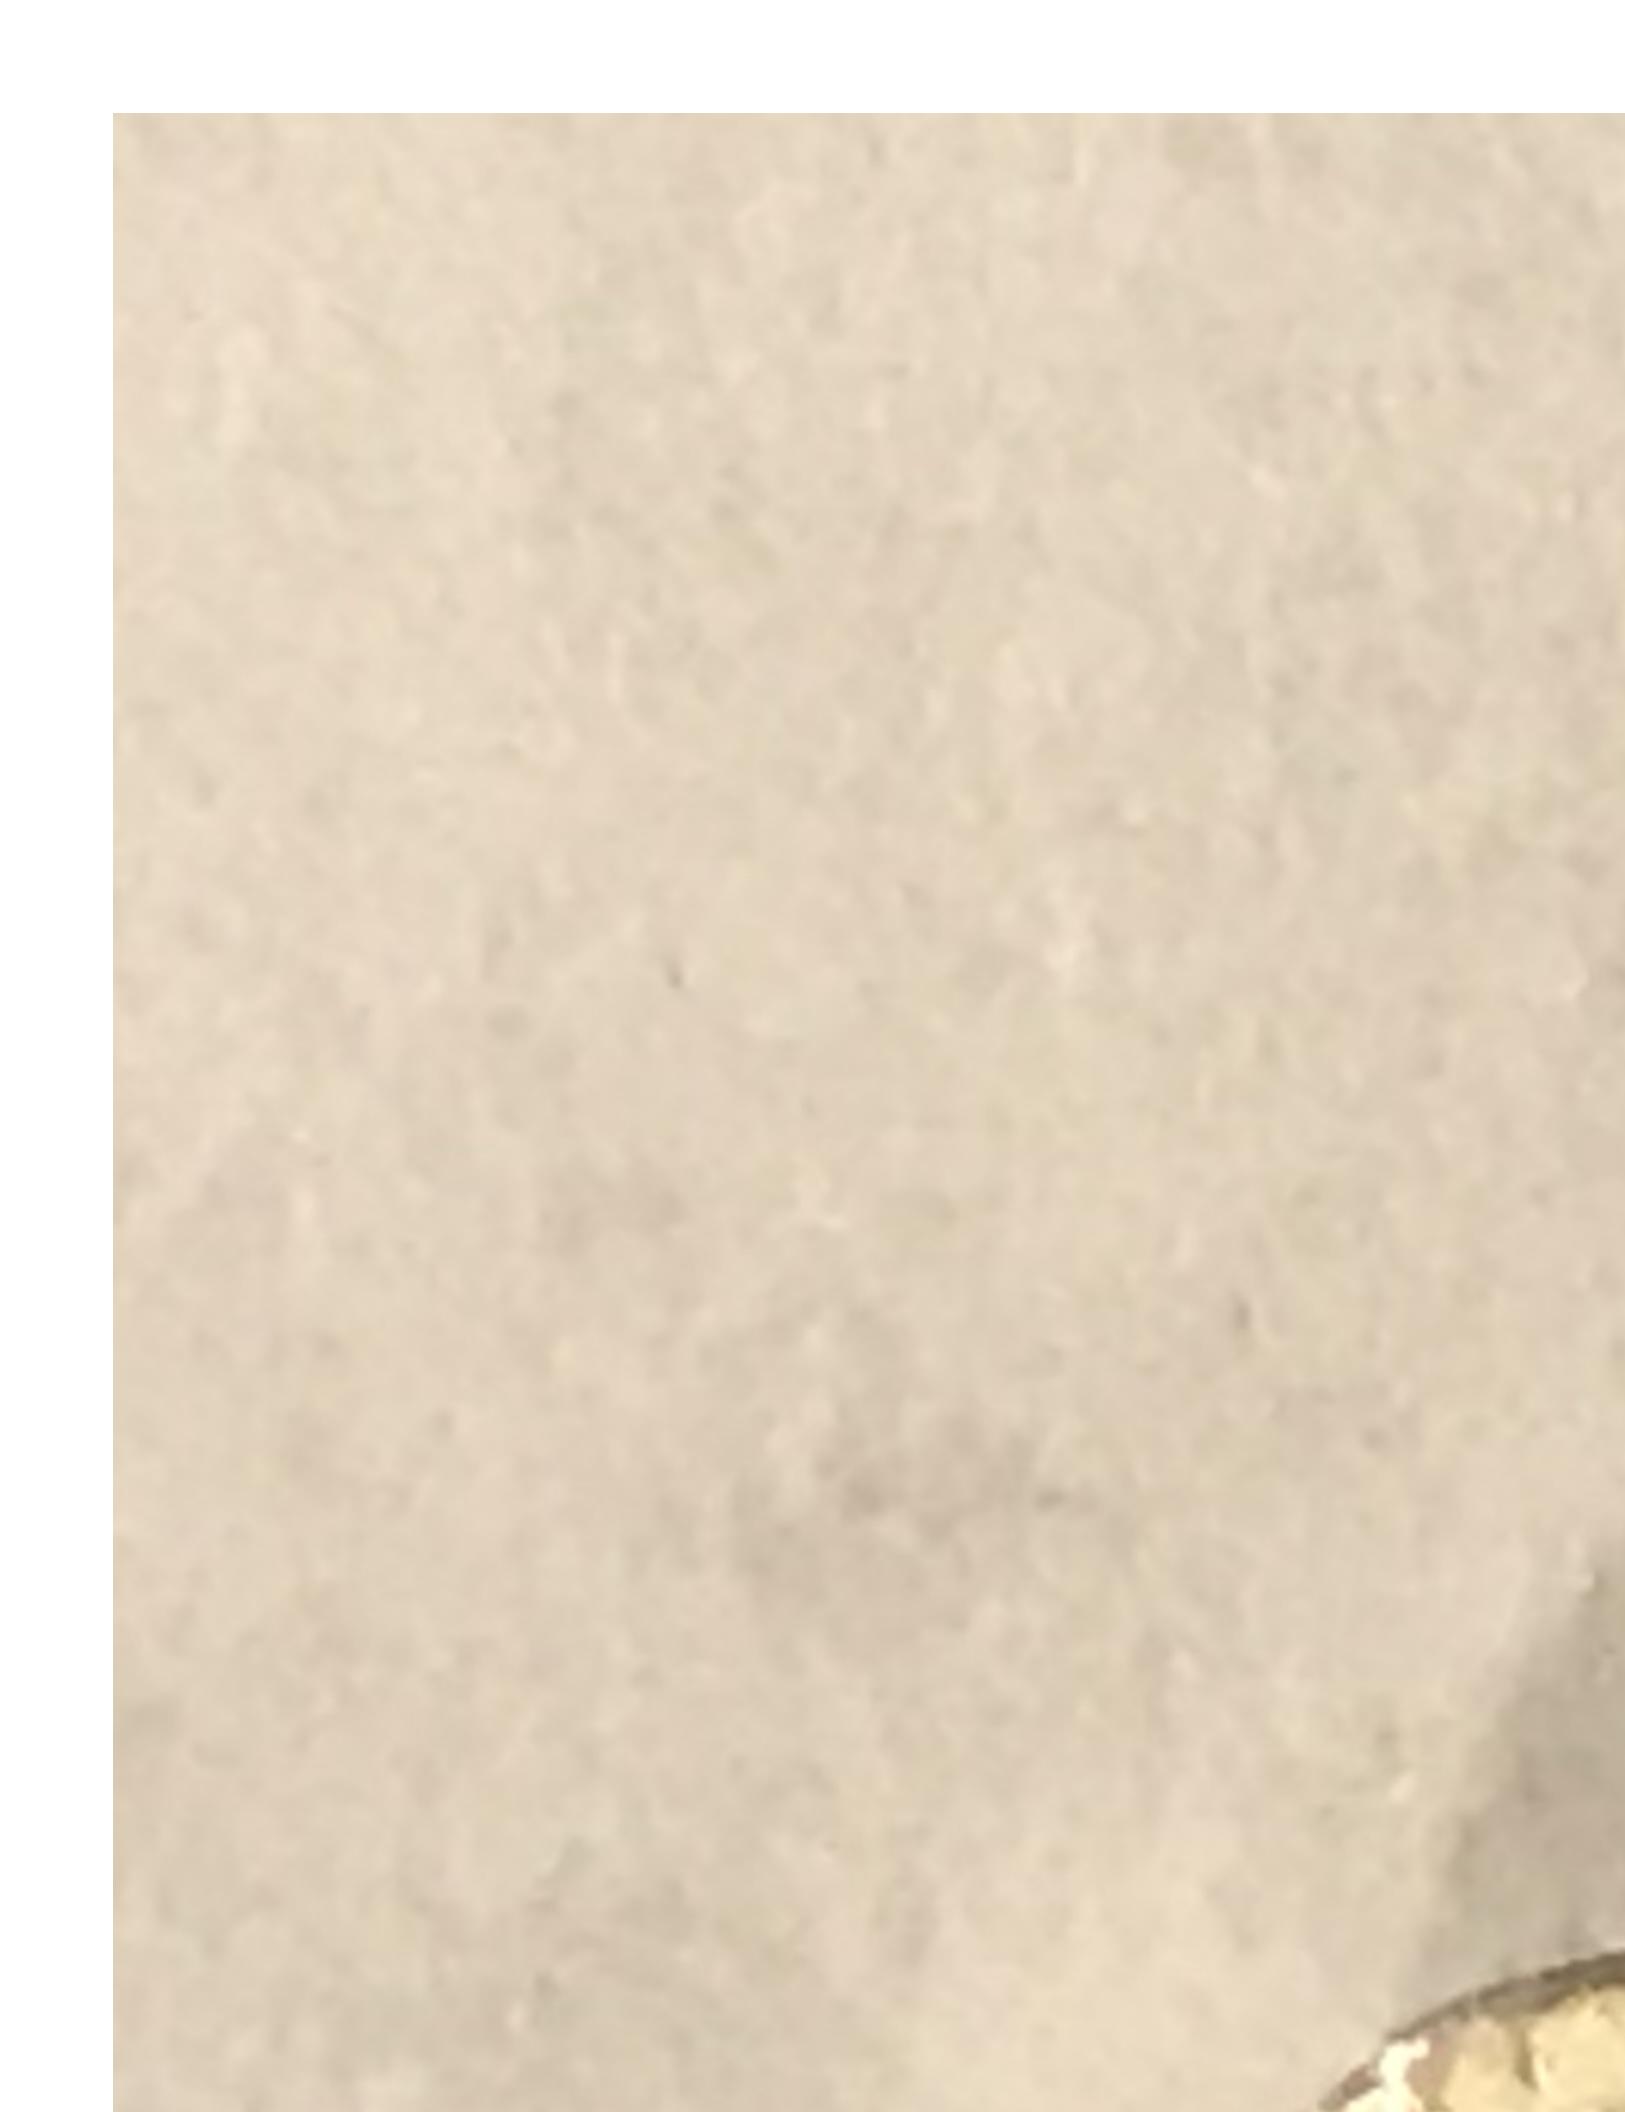

Length hour hand 4mm from the middle of the hole.

I dont know if these hands fit, because I dont know if it sits on the cannon pinion. :lol:

The watch that needs a hand:

Well, there's a first. Never seen a 15J duo dial—only 7J. And the 7J is the only one listed as duo dial in the book. The cannon pinion will be the same on both of yours.

The different one is on the regular 905 & 907, which are not duo dial. I think even they will share hands (at least hole size). The difference in pinion, wheels, etc. is largely sizing below the dial I'd assume, because of layout for duo dial vs center.

Thanx. It took me 7 years after your post to find a working reasonable priced example. 80
