The hand of this box feels like real leather. Mine is missing the insert. I've seen another, with a late 20's Quadron inside, and I'm thinking that's what it's for. Came with Wrist Watch guarantee paperwork inside.

That's a totally new one to me. I'm guessing the insert would display the watch upright and facing forward? Kind of like this:

If so, this would be the first box I've ever seen from the Guild era that displayed a watch in that orientation.

Correct. It leans backward when opened now, without the insert weight to balance it.
