The 1929 Gruen Watch Maker's Guild Book and the 1931 Supplement
Now available in the GruenWristwatches Bookstore in a new full-color book

You can now own a copy of this rare, full-color Gruen book. It's as close as Gruen ever got to publishing its own Identification Guide as there are a LOT of watches with model names, case and movement description, and the price. If you're into early Gruens, then this is the Gruen book for you!

You can find it in the GruenWristwatches.com Bookstore (www.GruenBooks.com is a shortcut to get there) as well as in my Lulu Bookstore.

This 200 page, full-color book is \$65 plus shipping. At 25% the cost of an original, it's a bargain.

Its pages are a little larger than 8.5x11 page size due to the oversized pages of the original. Every part of the original book has been duplicated, even the divider tabs. Photos of the finished book are shown in the bookstore.

I keep only a couple of these in stock at any time for local sales. The best way to purchase is through Lulu but you can buy from me directly via the bookstore or send me a Private Message if you don't see it in stock.
