I have started work on a Pan American Fleetwing. The original glass crystal is badly damaged so looking for a new one.

Bezel style number is 552-425 and its dimension is 21.75mm square (4 sides curved bezel).

Can anybody help me with one please. Thanks.

Could that be the CMS525 from GS Flexo? If so, there might be a chance that I have it. The catalog says it is 21.8 by 21.8 and for Gruen, not mentioning a model or style number.

Thojil

I have that crystal in glass, standard thickness in both Federal and Fulton.

Send me a private message if you are interested .

Thank you

Thank you veritas123. I have done the deal with mikethewatchguy already.

And thank you all for the fast and numerous reactions. It demonstrated to me again the great value of this forum as a source of not only information.
