You can now get a real EPUB version of the book "A Course in Wristwatch Repair The Gruen Horological Text and Technical Bulletins" on Google Play Books. Purchasing and downloading via the Google Play Store is very easy and efficient.

It has been formatted to take full advantage of EPUB features such as font re-sizing and table of contents. I've made the initial price very reasonable (cheap). So you can now get the Gruen Horological Text plus all of the technical bulletins on your tablet or phone for the low price of \$7.99! I am adding other titles as well so keep checking for new e-books.
